Governor Gray Davis
State Capitol
Sacramento, CA 95814

Dear Governor Davis:

I strongly urge you to ensure the CALFED Bay/Delta program.

I am very concerned about the quality of water in California and the impact of dams and canals upon the environment. I live adjacent to a creek that has been forced to flow between concrete walls instead of spreading naturally over and nourishing a marshland haven for birds and other wildlife. After each rain it becomes a river carrying a torrent of wall-to-wall styrofoam and other trash into Santa Monica Bay.

Decent planning on the part of government instead of subservience to the interests of developers could easily have prevented this. I hope you will reverse the philosophy of your Republican predecessors and maintain California's natural beauty and richness of wild places.

Sincerely,

Gail Osborne
